Postini Overview

What is Postini?

- **Postini is email security:**
 - Highly accurate spam and virus filtering
 - Anti-spam settings that can be tightened or loosened, depending on the needs of the user
 - Allows policies to be tailored to individual users, groups, and/or domains.

Spam Filters

Select the specific categories of junk email that you want to block from your inbox.

	Lenient			Aggressive	
Bulk Email	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	
Sexually Explicit	<input type="radio"/>	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	Adjust overall protection against sexually-oriented messages
Get Rich Quick	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	Adjust overall protection against money-making offers
Special Offers	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	Adjust overall protection against too-good-to-be-true offers
Racially Insensitive	<input checked="" type="radio"/>	<input type="radio"/>	<input type="radio"/>	<input type="radio"/>	Adjust overall protection against hate-oriented topics

Sender Lists

Approved Addresses will allow senders to bypass the junk email filters. Blocked Addresses will keep messages from reaching your inbox.

Are you trying to approve an email mailing list or newsgroup?

Approved Senders

To approve email for all addresses in an entire domain, enter in the form "domain.com".

– none yet –

To remove approved addresses,

Blocked Senders

To block email from an entire domain, enter addresses in the form "domain.com".

If a message has been quarantined, there is no need to add the spammers address or domain.

– none yet –

Summary

- Postini is the Defacto Standard for companies to
 - Dramatically reduce email spam
 - Tighten email security
 - Reduce overall cost of email system and technical email overhead
