- Health Insurance Firms
- Mortgage Companies
- Property management companies (shopping mall real estate)
- High schools and colleges
- Religious organizations
- Non-Profit organizations
- Engineering companies
- Pharmaceutical companies
- Software development companies

Services provided

Service 1:

- Monthly support agreements

Service 2:

- Contract jobs/one shot deals

Service 3:

- Computer network design from the ground-up

Has your company said this...

- “I wish there was a way for me to work from home and see everything I have on my office pc. Our company tried connecting to our office computers from home, but it was so slow and painful that no one in our office does it anymore.”
- “I hate that when I look at my emails outside of the office, I can only see new messages, not all of the new and old emails I see when I’m in the office.”
- “I wish there was a way my secretary could just see my calendar, so she could make appointments for me while I’m out of the office without me giving her my password so she has access to my whole computer.”

Has your company said this...

- “Our email system goes down all the time...”
- “A couple months ago ,our server crashed. Our company lost a lot of our files and we were down for a week.”
- “Every time our computer company shows up, they end up breaking more than they fix...”

Has your company said this...

- “Our computer person is so busy all the time it doesn’t seem like she’s able to keep up with all of our requests....she’s excellent at what she does, but I think at times she could use a second hand in addressing some things that we need done at my company.”
- “Our computer person gets frustrated with me every time I ask her to fix something, so I try to avoid asking her to fix things.”

Has your company said this...

- “It takes a couple days for our computer person to call us back when we call her to fix something....”
- “I have noticed that our computer files are scattered all over the pc’s in our office. I try to locate the Smith file from my computer, and Mike’s pc is off, so I can’t bring the letter up on my computer. Isn’t there a way we can just put all the files in a central place so we don’t have to keep all the pc’s on all the time?”
